

Here at Sterile Pro our revolutionary sanitation methods lead by a Doctor is going to set new standards in the field of sanitation & disinfecting in the workplace.

Our revolutionary and precise sanitization methods not only kill the bacteria and viruses, they nearly completely remove them as well.

This is our gold standard guarantee seal here at Sterile Pro. The Doctor seal guarantees quality, proper sanitation, and revolutionary disinfecting. Our hands on approach enable us to be focused on creating safe workplaces and keeping staff safe. Allow us to cradle your workplace, keep it safe, sanitized and clean. Thank you.

Burhan Adli
Doctor Co-Founder of Sterile Pro, LLC.

Professional medically staffed cleaning & sanitation services

I was trained at UCLA Ronald Regan Hospital, as I worked in the sterilization room where I compounded medications that must be free of any bacteria and viruses to prevent illness. Here is where I learned the proper way to sanitize an environment using the proper chemicals to prevent the spread of the viruses and bacteria.

Viruses (like Covid-19) have a unique way of penetration our cells with spike proteins and hijacking to replicate inside our body. Our chemicals degrade the viruses spike proteins making them inactive to replicate. The chemical also penetrates deeps past the viral protein coat and completely degrades the virus.

We have a revolutionary method called Hydrostatic Ionic Sanitation in which we use an ionizer fogger which activates the pre-charged chemicals when sprayed. When the solution is ionized (given a charge) it is much easier to kill the spike proteins on viruses or the cell membrane on bacteria. This has been proven to be the best method when fogging.

After the Hydrostatic Ionic Sanitation is complete. We let the solution sit for 5-10 minutes to degrade and kill the viruses and bacteria. Then we begin to physically spray down all touch points with a mix of hydrogen peroxide and alcohol solution, and wipe down those areas. We physically remove the bacteria and viruses in that area. This is a crucial step to make sure no virus or bacteria remains, consider it the cherry on top.

The solutions and chemicals we use are hospital grade quality and are carefully mixed to create a homogeneous mixture that specifically kills bacteria and viruses.

We at Sterile Pro LLC are here to help and prevent the spread of this virus to ensure a safe work environment. This is our gold standard and near guarantee of safety, sanitation and cleanliness in the workplace.

Sincerely,
Dr. Burhan Adli, PharmD
